Human rights policy

As The Thijs Group BV, we are certain that long-term business success can only be ensured if human rights are acknowledged and protected.

We are therefore committed to protecting human rights and preventing human rights violations.

Our commitment encompasses our own business operations, our business relationships, and impacts indirectly caused by our actions.

We appreciate that different countries have different laws, customs and cultures which impact business practices. To create common understanding about best labour practices we comply with the ethical Trade Initiative (ETI) base code

ETI Base Code - The 9 Principles are as follows:

- Employment is freely chosen
- Freedom of association and the right to collective bargaining are respected
- Working conditions are safe and hygienic
- Child labour shall not be used
- Living wages are paid
- Working hours are not excessive
- No discrimination is practiced
- Regular employment is provided
- No harsh or inhumane treatment is allowed

We set priorities and evaluate risks based on the severity of potential human right impacts.

In this context, we are aware that specific groups, such as minorities and women, are potentially more vulnerable to violations of their fundamental human rights.

Grievance mechanisms provide a suitable means of identifying adverse effects at an early stage.

For this reason, we have created grievance mechanism processes for our own employees and business partners.

Management of the Thijs Group B.V. is responsible for supervising the implementation of and compliance with the Human Rights Policy.

We are aware that the implementation of human rights due diligence is an ongoing development process, we will also review and further develop our Human Rights Policy on a continuous basis.
